Grid command – cooling function

- ◆ Grid command Hazy 1 Chapter 18
 - Carefully study temperature log rules, Sec 18.5
- ◆ Coronal equilibrium command
- ◆ Save cooling output
- ◆ Plot cooling vs temperature

Interstellar medium

From Wikipedia, the free encyclopedia

For other uses, see [Interstellar \(disambiguation\)](#).

In [astronomy](#), the **interstellar medium** (or **ISM**) is the [matter](#) that exists in the [space](#) between the [star systems](#) in a [galaxy](#). This matter includes [gas](#) in [ionic](#), [atomic](#), and [molecular](#) form, [dust](#), and [cosmic rays](#). It fills interstellar space and blends smoothly into the surrounding [intergalactic space](#). The [energy](#) that occupies the same volume, in the form of [electromagnetic radiation](#), is the [interstellar radiation field](#).

Star forming H II regions

- ◆ Hot young stars very close to the molecular cloud that formed it
- ◆ Ionizing radiation and stellar winds strike nearby molecular cloud

Make spectra of stable phases

- ◆ **Cold, warm, hot stable phases**
- ◆ **Ccurve.in**
 - Remove grid, vary option
 - Leave ISM abundances
 - Save continuum (units microns), cooling
- ◆ **Compute stable points**
 - T=5e2K 2e4K, 8e4K, 1.5e6K, 2e7K
